

Hydrotech® Hydrocap 90FR-M

formerly known as Hydrocap 90FR-M

BUILDING TRUST

GENERAL DESCRIPTION

Hydrocap 90FR-M is a specially formulated, heavy duty, rubberized asphalt protection/cap sheet with fiberglass reinforcement and a fire rated, non-combustible, ceramic granular surface.

BASIC USE

Hydrocap 90FR-M is specifically designed to be embedded into Hydrotech's Monolithic Membrane 6125® roofing membrane assemblies to act as the protection course for the membrane. Hydrocap 90FR-M is not intended to be used as the finished surface of the roof. It can be left exposed for periods up to 9 months.

Hydrocap 90FR-M must be used as the separation/protection sheet when the MM6125 roofing assembly is required to have approval/acceptance by Factory Mutual Research Corporation (FMRC).

Additional protection is normally required in traffic areas and where physical abuse is anticipated.

SIZES

Hydrocap 90FR-M is available in roll form, with a width of 39.76 inches (1 m) and a length of 33.3 feet (10.15 m). One roll equals approximately 100 square feet (9.3 sqm) of coverage.

TECHNICAL DATA

PROPERTY	TEST METHOD	RESULTS
THICKNESS		0.130 in. (3.3mm) ± .003
WEIGHT		81.5 lbs (37 kg)/roll
